## EDUCATION

---

### University of California, Santa Cruz

*Expected June 2027*

B.A. Computer Science | Minor: Technology Information Management

- GPA: 3.53 | Dean's Honors List | Google IT Support Professional Certificate
- Relevant Coursework: Data Structures & Algorithms, Computer Systems Design, Computer Systems & C Programming, Business Information Systems, Management of Technology

## EXPERIENCE

---

### UC Santa Cruz Information Technology Services – Technical Support Specialist, Hardware Depot

*Incoming Fall 2026*

- Selected for an ITS hardware support role focused on endpoint device provisioning, equipment deployment, troubleshooting, inventory coordination, and secure equipment lifecycle processes for campus technology operations.

### GetVirtual – Business Assistance Intern, Team Lead

*March 2026 – Present*

- Lead a student consulting team supporting a local small business with website development, SEO planning, social media strategy, digital distribution research, and overall online presence growth.
- Gather client requirements, define deliverables, coordinate backend/hosting, UI/UX, content, and outreach workstreams, and translate business needs into organized project plans and next steps.

### Adobe – Student Ambassador

*Nov 2025 – Present*

- Support Creative Cloud adoption through student outreach, product education, workshop facilitation, and guidance on Adobe tools, access, and account setup.
- Help students connect software capabilities to academic and creative use cases, strengthening engagement with campus-licensed digital tools and peer-facing technical support.

### UC Santa Cruz University Library – Library IT & Circulation Maintenance

*Feb 2024 – Present*

- Provide frontline technical and operational support for patrons and staff across Windows and macOS systems, public-use technology, circulation platforms, booking tools, and service desk workflows.
- Maintain device inventory, lending equipment processes, check-in/check-out accuracy, and day-to-day troubleshooting for library hardware, user-facing systems, and technology access needs.

## PROJECTS

---

### IdeaFlow – AI Product Planning Tool

*2026*

- Developed a RAG-oriented product concept that turns rough startup ideas into structured plans, decision criteria, MVP prioritization, and risk analysis using schema-driven AI outputs and deterministic scoring logic.

### EzCrop – AgTech Startup Concept

*2025*

- Developed an automated communication and distribution concept connecting farmers, clients, and distributors, translating customer discovery insights and workflow pain points into scalable product requirements.

### Automated Beat Maker – Web Application

*2025*

- Built a browser-based music tool using JavaScript, TypeScript, React, and the Web Audio API, addressing timing, audio playback, and interactive pattern-generation challenges.

## LEADERSHIP

---

### National Society of Black Engineers – Programs Chair, Executive Board

*2026 – 2027*

- Elected to plan programs, workshops, and community-building events that support member engagement, professional development, and the UCSC NSBE student experience.
- Collaborate with executive board members and campus partners to organize high-impact programming, strengthen participation, and turn event ideas into executable plans.

Alpha Epsilon Pi Fraternity – Active Member | Men of Color Healing Association (MOCHA) – Program Graduate, 2024

## TECHNICAL SKILLS

---

Languages & Tools: Python, C/C++, SQL, JavaScript, TypeScript, React, GitHub, Google Workspace, Microsoft 365

IT & Systems: Windows, macOS, endpoint device support, hardware troubleshooting, software onboarding, inventory workflows, user support, technical documentation

Project & Operations: Requirements gathering, stakeholder communication, project coordination, client discovery, event planning, digital strategy

AI & Product Systems: RAG concepts, structured JSON outputs, deterministic scoring logic, MVP prioritization, risk analysis
